Italian American History

Dr. Anthony Fauci, Director of the National Institute of Allergy and Infectious Diseases for over 30 years, has emerged as the most trusted public official due to his dedication in the medical world. What a pride for his Italian ancestry. Dr. Fauci, an Italian American from Brooklyn, is playing a major role in the fight against Covid-19. The humble gentleman was born to Italian immigrants on December 24, 1940. His parents were Stephen and Eugenia Fauci, who owned and operated a pharmacy. His father was a pharmacist, and his mother and sister also worked in the family-owned pharmacy, along with a young Fauci, who delivered prescriptions.

Fauci's paternal grandparents, Antonino Fauci and Calogera Guardino, were from Sciacca, Italy. His maternal grandmother, Raffaella Trematerra, from Naples, Italy, was a seamstress. His maternal grandfather, Giovanni Abys, was born in Switzerland and was an artist, noted for landscape and portrait painting, magazine illustrations (Italy) as well graphic design for commercial labels, including olive oil cans. His great-grandparents emigrated to the US in the late 19th century.

Dr. Fauci, 79, attended Cornell University Medical College where he graduated first in his class with an M.D. in 1966. Over his career, he has led the nation's response to HIV, SARS, MERS and Ebola. The workaholic doctor married in his early 40's, has run in three marathons, and is the father of three adult daughters.

A very hard working and dedicated person, who continues to be caring and concerned for his countrymen. Our deep appreciation to this brilliant man. May God bless Dr. Fauci and his family members. *Siamo orgogliosi*, very proud of you, Dr. Anthony Fauci. *Grazie!*
